

Task C02. A+B

 0.3 сек.  24 MB

Author: Iliyan Yordanov

Given two numbers A and B , write a program **A+B** that finds the sum of those numbers.

Input

The first line of the standard input contains two positive numbers A and B separated by a space.

Output

On a single line of the standard output, your program should output the sum of the two numbers.

Constraints

- $1 \leq A, B \leq 10^{36}$
- For tests that provide 37 points: $A, B \leq 10^{18}$.

Example

Input	Output
4 2	6
